Mufaddal Hirani

Software developer · final-year B.Sc. IT student

Vasai (Mumbai area), India mufaddalhirani7@gmail.com mufaddalhirani.github.io/portfolio
github.com/mufaddalhirani linkedin.com/in/mufaddal-hirani

PROFILE

Final-year IT student who builds and ships desktop and web software end to end. My main project, Lyrigen, is a local-first Windows music player (Electron, React, TypeScript, Web Audio) with an on-device AI lyric aligner in Python. Hands-on background in CCTV and access-control installation, and customer-facing technical support experience. Looking for an internship or junior developer role, remote or in Germany, from 2027.

PROJECTS

2026 - today

Lyrigen: local-first music player for Windows

Electron · React · TypeScript · Vite · Web Audio API

- Designed, built and released it solo. Public Windows installer and portable builds via electron-builder.
- Wrote tempo and beat detection (autocorrelation + comb search), a phase-locked, beat-matched DJ mixer, and a WSOLA pitch shifter as an AudioWorklet.
- Combined five lyric sources and ranked them by timing precision. Playwright-driven smoke and visual checks.

2026 - today

Lyric Studio: on-device AI lyric alignment

Python · faster-whisper · Meta MMS forced aligner · CustomTkinter

- Word- and syllable-level timing for any song. Keeps human-made timing, checks it against the recording and adds syllables.
- Syllabification for English, Indic scripts and Japanese. A GUI plus a CLI that streams JSON events, which Lyrigen uses as its engine.

09/2026

Browser extensions for YouTube (Manifest V3)

JavaScript · Chrome Extensions API

- YouTube Music Select All: bulk-selects 2,000-song playlists in seconds by calling the page's own components. No permissions, Trusted Types compliant.
- Just This Video: a focus mode that hides recommendations and Shorts, with settings synced through chrome.storage.

EXPERIENCE

06/2025 - 09/2025

Level 2 Digital Case Manager

Concentrix, Mumbai · Optus account (Australian telecom)

- After two months of training, handled escalated home Wi-Fi cases that Level 1 support could not resolve.
- Outbound calls, step-by-step troubleshooting and follow-ups until resolution. Resolved 50–60 escalated cases in the first month.
- Left to concentrate on my degree.

since 2020

Practical experience: security-systems installation

Family business, informal and alongside school and studies

- Installed IP, Wi-Fi and analog CCTV and biometric attendance and access systems. Low-voltage cabling, recorder and viewing-software setup.
- Sites included a school, a construction site, shops, and residential and commercial buildings. Handed over and explained systems to customers.

EDUCATION

2023 - 2027

B.Sc. Information Technology (expected mid-2027)

Rizvi College of Arts, Science and Commerce, University of Mumbai

- Minor in Statistics. Revised NEP 2020 curriculum including AI modules.
- Repeated second year (2025–26). All outstanding exams cleared in 2026.

SKILLS

Languages	TypeScript, JavaScript, Python, HTML, CSS · Luau · coursework: C, C#, SQL, R
Frameworks & tools	React, Electron, Node.js, Vite, Web Audio API, Chrome Extensions (MV3), Playwright, Git, GitHub
AI & audio	faster-whisper, forced alignment (Meta MMS), beat detection, DSP basics, CUDA setup
Hardware & networks	CCTV (IP, Wi-Fi, analog), biometric access, cabling, home Wi-Fi troubleshooting
Learning now	Java and Spring Boot, automated testing and CI, German

LANGUAGES

English	Fluent (spoken and written)
Hindi, Urdu, Gujarati, Marathi	Fluent (spoken)
Arabic	Reading
German	Beginner, currently learning

INTERESTS

Electric and acoustic guitar, music production, treks.
